TriGem Solutions™ is organizing workshops on SIX SIGMA BLACK BELT based on ASQ body of knowledge, which will be held in Mumbai / Pune from 30th January 2011 to 27th February 2011 (on Sundays).

Improve Your Career Options with a Professional Certificate

In today's competitive business environment, leaders are appointed based on credentials and experience. To stay ahead of the competition, advance your career and increase your earning potential, enroll in one of TriGem Solutions™ professional certificate programs. Convenient and affordable, Courses are designed to ensure you gain mastery of a particular topic, and instructors are highly qualified leaders in their professions.

Six Sigma Black Belt Certificate Program – Cutting-edge training - Extraordinary results

Take your organization to the next level of productivity and profitability with TriGem Solutions™ Six Sigma Green and Black Belt Training Programs. Our programs provide organizations large and

small, from manufacturing to service industries, the tools and techniques to dramatically improve their processes and financial performance—thereby ensuring their competitive edge in the marketplace.

Program Benefits:

Your company's bottom line will benefit from your ability to:

Execute better: Six Sigma links strategic plans to operational improvements to create efficiencies for your business.

Build customer loyalty: Six Sigma helps you target your customer needs, so you can improve the things that matter most to your customers.

Create greater returns by lowering operating costs and delivering products and services quicker and with higher customer satisfaction through operational excellence.

Six Sigma Black Belt

Focus on the principles of Project Management of and Six-Sigma projects, and how to integrate the tools and techniques into an actual project. Project Management is an effective method for producing agreed upon deliverables within the constraints of schedule, cost and quality. Six-Sigma and are Process Improvement philosophies and methodologies. When combined, the three methodologies can produce startling results to improve processes. Structured as a series of hands-on workshops, this integrated multi certificate program builds upon the competencies acquired during the Six Sigma Green Belt program allowing you to obtain one level of certification and return for higher levels of certification as needed. The black belt level provides the tools, methodologies and experience needed to become six sigma and certified. The topics covered

involve the use of brief lectures, team-based exercises and videos. Team based exercises are used because they allow participants to acquire experience applying the tools and methodologies demanded by the market place.

What is Six Sigma?

Six Sigma is a philosophy of doing business with a focus on eliminating defects through fundamental process knowledge. Six Sigma methods integrate principles of business, statistics and engineering to achieve tangible results.

Six Sigma tools are used to improve the processes and products of a company. They are applicable across every discipline including: Production, Sales, Marketing, Design, Administration and Service.

- **Six Sigma offers a wealth of tangible benefits. When skillfully applied by your people:**
- **Six Sigma reduces costs by 50% or more through a self-funded approach to improvement.**
- **Six Sigma reduces the waste chain.**
- **Six Sigma affords a better understanding of customer requirements.**
- **Six Sigma improves delivery and quality performance.**
- **Six Sigma provides critical process inputs needed to respond to changing customer requirements.**
- **Six Sigma develops robust products and processes.**
- **Six Sigma drives improvements rapidly with internal resources.**

The great thing about Six Sigma certification is that it is perfect for all businesses, whether you are a large corporation producing a product or a small business that specializes in customer service.

Why should you go for Six Sigma Certification?

Six Sigma - Certification is becoming an expectation in the business world. According to the survey conducted in Cleveland Employers started preferring Six Sigma over MBA. This discipline was developed as a systematic way to improve quality, but the reason it caught fire was its effectiveness in cutting costs and improving profitability. According to the American Society for Quality, 82 of the 100 largest companies in the U.S. have embraced it. And that's quickly trickling down: Six Sigma consultants are as busy as ever as the quality-improvement system migrates from its traditional focus on U.S. manufacturing companies to the financial-services industry and abroad. In recent years, companies as varied as DuPont (DD), Textron (TXT), Bank of America (BAC), and Sun Microsystems (SUNW) have all made Six Sigma bedrocks of their culture. Hybrid formulas have spawned, such as Lean Six Sigma and Design for Six Sigma. WCBF, an organization that organizes conferences about the process, has 14 events planned this year, up from seven last year.

Who should take the Six Sigma Black Belt Training and Certification Course?

This course is ideal for anyone who desires or is required to learn the in-depth quality, process and statistical skills needed to lead Sigma teams and projects to increase process performance leading to higher profitability, lower costs and higher customer satisfaction within hi/her organization. Also two completed projects with signed affidavits, or one completed project with

signed affidavit and three years of work experience in one or more areas of the Six Sigma Black Belt. You do NOT need to be a Certified Six Sigma Green Belt.

Prerequisites for Six Sigma Black Belt Training and Certification course:

Participants with minimum one year experience.

Why TriGem Solutions™ for Six Sigma?

TriGem Solutions™ is a premier training organization engaged in providing Six Sigma and other quality related training. We recognize your need for relevant, practical training to give you the skills, tools and techniques to return more fully equipped to contribute to your organization's success. And our experience shows this approach works, helping improve the rate of learning.

What differentiates TriGem Solutions™ from its competitor is its commitment towards customers. Most of the training organization provides Six Sigma training for about 5 to 7 days at a stretch. By the time a student completes the course and has some doubts, these organizations are out of bound. You never get an opportunity to talk one on one with the trainer again after the completion of the course period to get your doubts clarified.

Six Sigma is not an instant coffee. It takes time to develop & nurture that thought process and inquisitive approach. It is very difficult to think on those lines merely after a 5-7 day of Six Sigma training. You require continuous guidance and support to nurture that spirit. Hence our training program are spread across span of at least 1 month so that you can learn at their own speed and imbibe that thought process (every Sunday). More over for next 3 months after the completion of the course, we are there to handhold & support you. Trainers are available at all time to assist you & clear your doubts. You can contact them in person, via email or telephone.

Six Sigma Management Institute is pioneer six sigma training and testing organization and have made available this exam and certification.

Visit www.ss-mi.com and www.mindprotesting.com for details.

American Society for Quality (ASQ)

ASQ Certification

Certification is formal recognition by ASQ that an individual has demonstrated proficiency within and a comprehension of a specified body of knowledge at a point in time. It is peer recognition and not registration or licensure. Since 1968, when the first ASQ certification exam was given, more than 85,000 individuals have become certified through ASQ, including many who have attained more than one designation. Although ASQ membership is not a prerequisite for certification, most of the people who hold one of these designations do belong to the Society. Certification ranks as one of the top benefits of ASQ membership.

Benefit of two certifications

Both these certifications (ASQ & SS-MI) are world class qualifications, top two certifications available globally!! ASQ exam is conducted only twice a year. However, SS-MI exam is online and can be completed any time. ASQ is recognized for depth of statistical thinking. SS-MI requires statistical as well as Minitab proficiency. Thus, candidates with these two world class certifications will have an edge over other green belts. Moreover, with TriGem Solutions™ training methodology, you get eligible for these two certifications and certified by TriGem Solutions™ only at half the cost compared with any of the other international certification!!

Eligibility: FOR SS-MI Certification

Graduates / Diploma of any faculty. Practical experience desirable.

Eligibility: FOR ASQ Certification

For ASQ exam:-Submission of affidavit from project sponsored for having completed at least one improvement project successfully.

The sponsorer may be employer or from friendly organization.

The improvement can be in terms of cost, defects, design, cycle time, etc.

Two project affidavits required for candidates having less than three years of experience.

Only about 500 candidates have obtained ASQ Six Sigma Green Belt Certification so far in India, and they are in great demand!

TriGem Solutions™ is not affiliated nor associated with ASQ or SS-MI. However, TriGem Solutions™ has professionals, certified by ASQ and SS-MI as Six Sigma Black Belts

Six Sigma Black Belt Program Details:

Eligibility: Participants with minimum one year experience.

Duration: 5 days

Location: Mumbai / Pune

Timing: Sunday Program: 9.30 a.m. to 6.00 p.m.
